Art Unit: 1616

DETAILED ACTION

Examiner notes that the rejections herein, except as provided for in the double patenting rejection below, are not intended to and does not apply to subject matter which was found to be allowable in US Pat. App. No. 09/406,568.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 3-5,7-15, 26 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over the claims Patent No. 6468967. Although the conflicting claims are not identical, they are not patentably distinct from each other because they claim similar subject matter, i.e. a method of delivering daptomycin in dosage intervals, including intervals that do not result in muscle toxicity and in combination with other antibiotics.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Application/Control Number: 10/082,544

Art Unit: 1616

Claims 1-4, 11, 13-15, 26 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for methods of adminstering daptomycin such that it does not cause muscle toxicity, does not reasonably provide enablement for methods of administering daptomycin derivatives, A54145, A54145 derivatives or other lipopeptide antibiotics in such a manner that they do not cause muscle toxicity. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims. The only working examples provided are for daptomycin and combinations with other antibiotic drugs do not appear to have been tested as to compatibility or effect on muscle toxicity. It is well known in the art that even structurally similar antibiotics can have different modes and ranges of toxicity (Remington's, pp. 1176-1213. As such, without working examples a skilled artisan would be required to perform undue experimentation in order to determine first whether the same also cause muscle toxicity and second the suitable doses and intervals which would not exhibit muscle toxicity for the dantomycin derivatives, A54145 or A54145 derivatives or other lipopeptide antibiotics.

Examiner has duly considered Applicant's arguments but deems them unpersuasive.

Applicant does not appear to have provided evidence that other lipopeptide antibiotics cause muscle toxicity and if so, what dosage intervals, would be effective in minimizing the same. In light of the evidence that structurally similar antibiotics can have different modes and ranges of toxicity, it does not appear that the claims are commensurate in scope with the enablement set forth in the Specification. As such, a skilled artisan would be required to perform undue experimentation in order to determine first whether the same also cause muscle toxicity

Art Unit: 1616

and second the suitable doses and intervals which would not exhibit muscle toxicity for the dantomycin derivatives, A54145 or A54145 derivatives or other lipopeptide antibiotics.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

A facsimile center has been established in Technology Center 1600. The hours of operation are Monday through Friday, 8:45 AM to 4:45 PM. The telecopier numbers for accessing the facsimile machines are (703) 308-4556 or (703) 305-3592.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frank Choi whose telephone number is (703) 308-0067. Examiner maintains a flexible schedule. However, Examiner may generally be reached Monday-Friday, 8:00 am -5:30 pm (EST), except the first Friday of the each biweek which is Examiner's normally scheduled day off.

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's Supervisor, Mr. José Dees, can be reached on (703) 308-4628. Additionally, Technology Center 1600's Receptionist and Customer Service can be reached at (703) 308-1235 and (703) 308-0198, respectively. FIC
